Question 1

Looking back on Economics S131 01, what is your overall assessment of the course? What are its strengths and weaknesses, and in what ways might it be improved?

Response 1

It's not bad - I doubt the course could be improved because there's only so much fun Econometrics can be.

Response 2

The class is very good, the preparation of the lecture, the class discussion, homework, and the software learning experience is all very rewarding.

Response 3

This is a phenomenal class. The material, which is extremely applicable, can be tricky to explain, and the professor does a wonderful job of articulating these abstract concepts to the point of making the material fascinating. Take this class if you think you will go into anything to do with numbers--business, finance, research, life.

Response 4

The class was very interesting and Doug McKee is a great guy who is very approachable and wants everyone in the class to know what is going on.

Response 5

The whole course was structured in such a way that it allows us to have the statistics background and also the applications of econometrics theories.

Response 6

I enjoyed this course. For someone who takes a lot of math and statistics, it was nice to understand the applicability of some of the things I've had to prove in other classes.
